

# Would girls buy the product?

# Would boys buy the product?

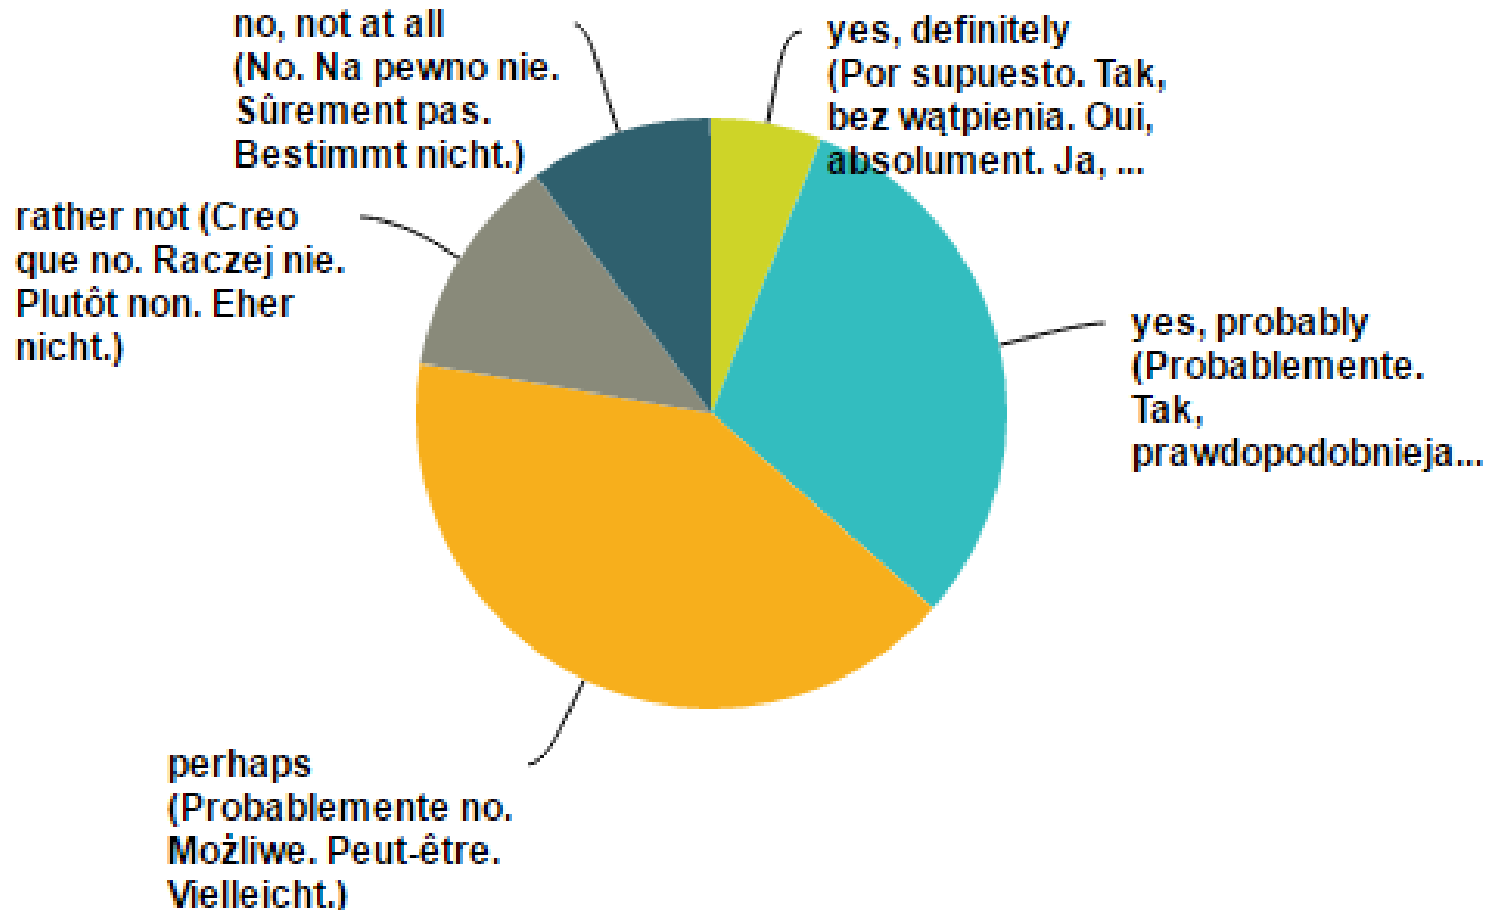

# Would people buy it?

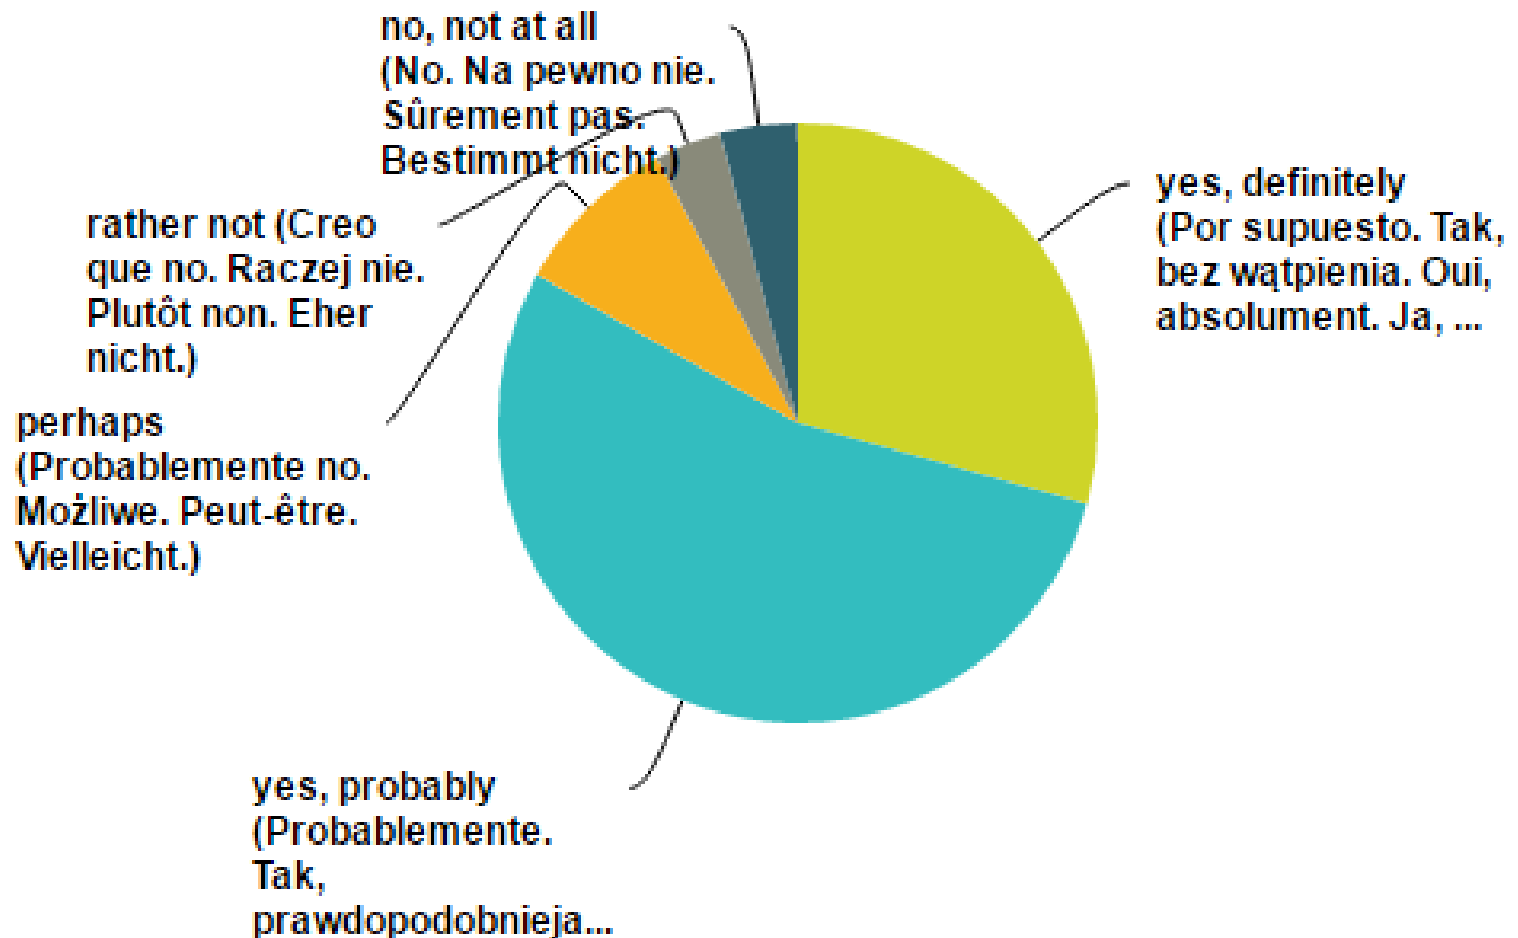

# Would french people buy it?

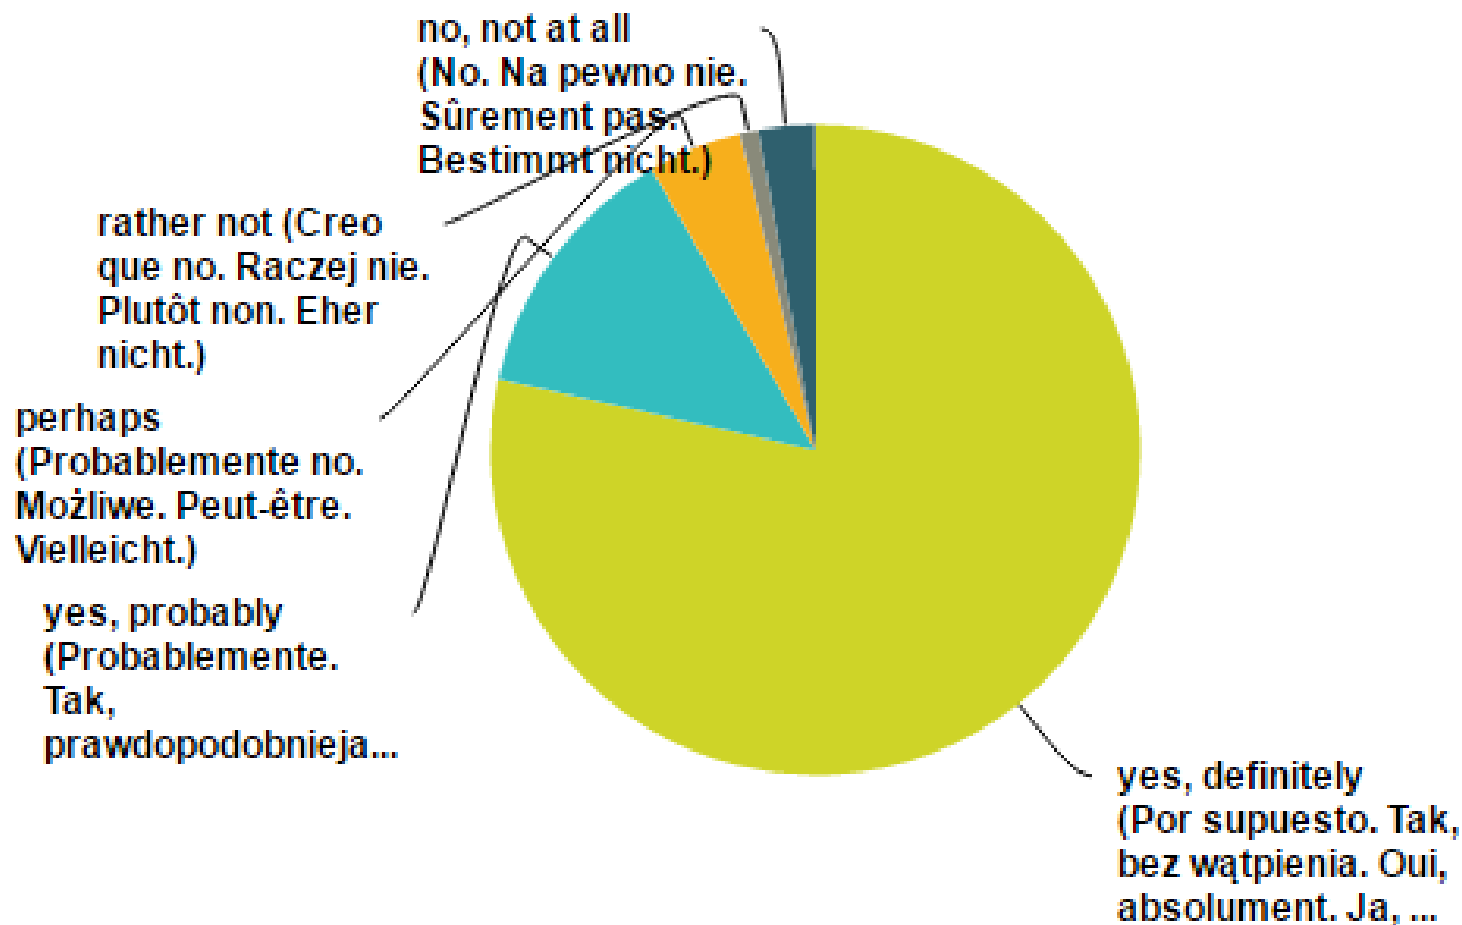

# Would german people buy it?

# Would spanish people buy it?

# Would polish people buy it?

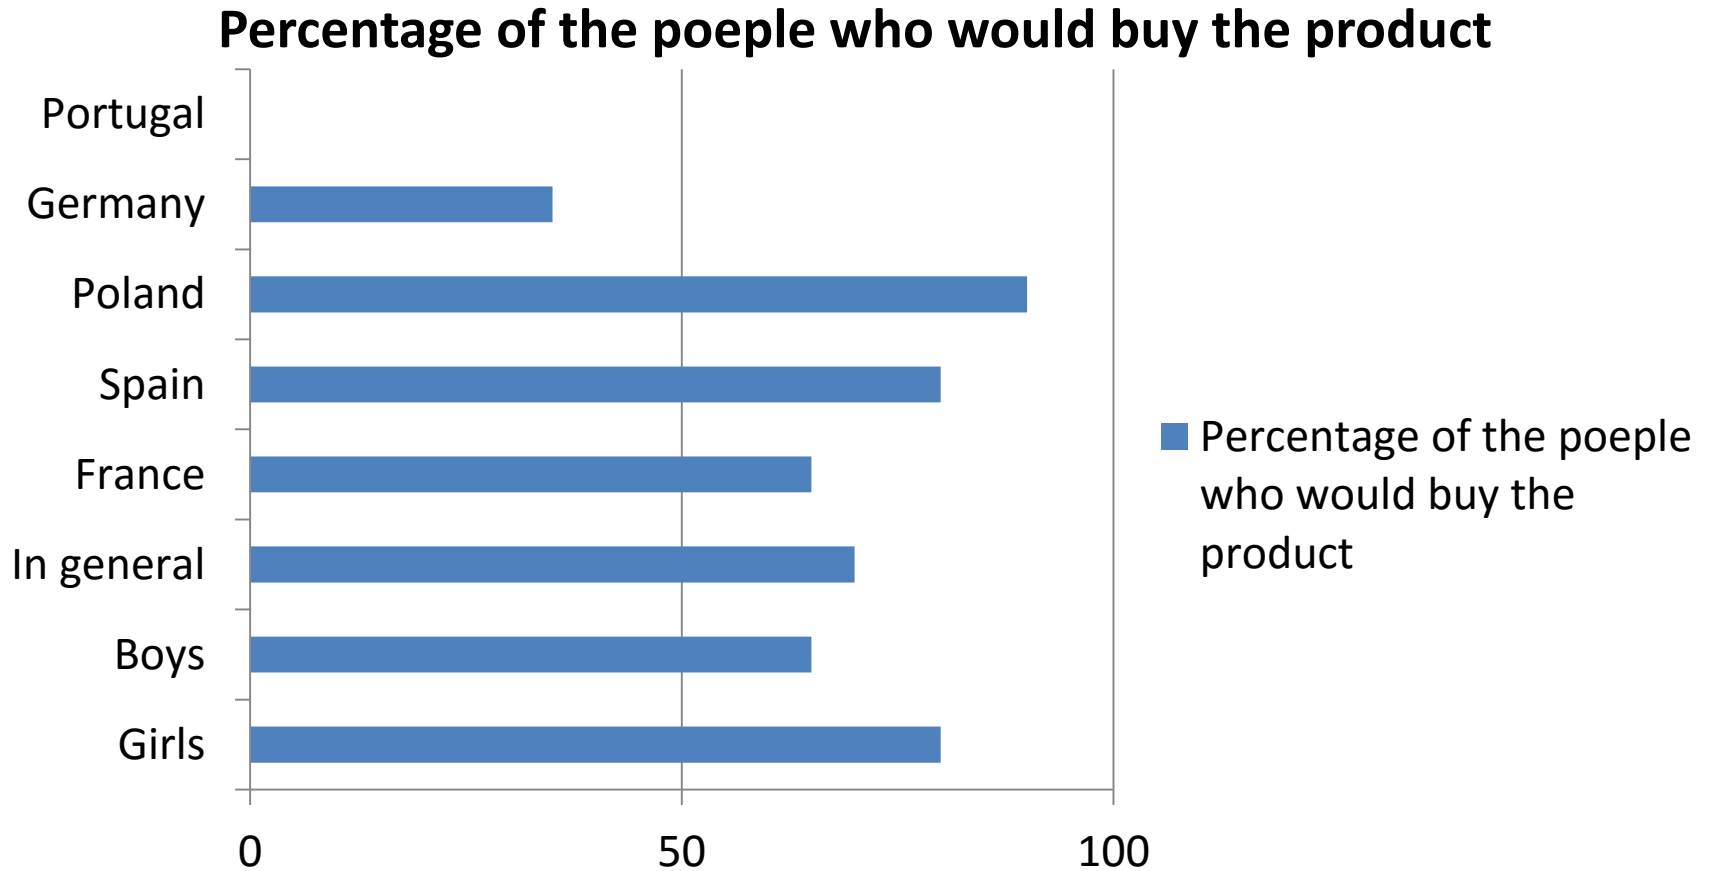

# Would portuguese people buy it?

# Conclusion

More than a half of the people (except in germany and portugal) would buy the product assuming the price is right for them. Also girls are more interested than the boys but not too much.
